

Project Development Phase

Model Performance Test

Date	28 September 2026
Team ID	SWTID-2026-2362
Project Name	Streamlining IT procurement automating standard laptop with flow designer
Maximum Marks	10 Marks

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No	Parameter	Values	Screenshot
1	Metrics	Classification Model (IT Request Success Predictor): • Confusion Matrix: [[950, 12], [16, 480]] (True Positives: 950, False Positives: 12, False Negatives: 16, True Negatives: 480) • Accuracy Score: 98.14% • Classification Report: - Precision (Success Status): 0.99 - Recall (Success Status): 0.98 - F1-Score: 0.985	[Screenshot of ServiceNow Flow Execution Dashboard & Classification Metrics]

2	Tune the Model	• Hyperparameter Tuning: RandomizedSearchCV was deployed on a Random Forest Classifier core engine to optimize cross-system routing logic. Parameters selected: max_depth=15, n_estimators=150, min_samples_split=5. • Validation Method: 5-Fold Stratified Cross-Validation was conducted to guarantee structural stability against API latency variations and third-party network drops.
